

# TECHNOLOGY & INNOVATION

Journal of the National Academy of Inventors

## INSTRUCTIONS FOR AUTHORS

### To Submit

Fill out the T&I Transmittal Form from the Authors section of our Resources page, prepare the manuscript and any tables or figures according to the instructions below, and email all files to [tijournal@academyofinventors.org](mailto:tijournal@academyofinventors.org).

### Submission Types

#### ARTICLES

The journal subscribes to the concept that the length of an article is determined by its content; however, we encourage submission of no more than 6,500-7,500 words. Authors may be asked to edit articles that exceed 7,500 words.

#### EDITORIALS

Commentaries and discussions, letters to the editor, editorials, and similar contributions: These are subjected to peer review on a case-by-case basis, are required to follow *Technology and Innovation's* format and style, and must be consistent with the requirements of a scholarly journal. The discussion of contested areas of science where consensus is lacking is included in this category. Commentaries are shorter than regular manuscripts and must contain information that is likely to invoke scientific discussion with the objective of promoting the development of a consensus. We encourage submissions of no more than 3,500-4,500 words.

#### PATENT REVIEWS

New patents of interest to the readers of *Technology and Innovation* are included in this category. We encourage submissions of no more than 1,500-2,500 words.

## Preparation of Manuscripts

Submissions to Technology and Innovation must be in English, in an editable Microsoft Word-compatible electronic file, typed, 12-point font, double-spaced, formatted for 22 x 28 cm (8.5 x 11 in) with a margin of 2.5-3 cm (1 in) at the top, sides, and bottom of each page. Tables should be placed on separate page(s) sequentially at the end of the manuscript (after the 'Reference' section). Figures should be submitted separately from text.

**Title page:** Each paper should include a title page with the title of the paper, submission type, name(s) of author(s), and complete affiliation(s). Provide a short title to be used as running head. Indicate the author to whom correspondence and proofs should be addressed (i.e. 'corresponding author'), and provide a complete physical mailing address, phone, fax, and email address.

**Title:** The title should be as short as possible but fully descriptive.

**Submission Type:** The author should indicate the type of submission that best describes their manuscript (Article, Commentary, Editorial, or Patent Review).

**Abstract and key words:** The abstract should contain a summary of the article, including its results in 250 words or less. Because many abstracting services use the abstract without reference to the content, the authors are urged to succinctly provide the essence of the paper in the (up to) 250 words allocated. Additionally, provide 3 to 6 key words after the abstract.

**Tables and figures:** Tables and figures should be understandable without excessive reference to the text; particularly, units and quantities should be clearly identified. In general, material should be presented in tables or figures but not in both. Avoid very wide or long figures and tables that would not fit on a printed page. By default, tables and figures will appear in B&W. If color figures are necessary or desired, there is a charge for their reproduction. Figures should be submitted at the highest resolution possible, preferably 300dpi at 7 inches (width or height). Low-resolution files that appear pixilated when printed will NOT be accepted for publication.

**Tables:** Present each table on a separate page at the end of the manuscript (i.e., not within the body of the text). Provide a short title for each table. Cite all tables sequentially in the text and provide publishing staff with a cue for where they should approximately appear in the manuscript (e.g., 'INSERT TABLE 1') when published. Tables should be in an editable format.

**Figures:** Figures should be submitted separately from the text. Cite all figures sequentially in the text and provide publishing staff with a cue for where they should approximately appear in the manuscript (e.g., 'INSERT FIGURE 1') when published. All figures must be high-quality art work in electronic format. Lettering should be large enough to be readable when reduced to fit page or column size. Avoid light lettering and gray shading. SPECIAL NOTE: Figures in accepted submissions are printed for free in Black & White. If you wish to have your figures reproduced in color, there is an additional fee for this service. All legends for figures should be included on a separate page at the end of the manuscript.

**Equations:** All equations should be typewritten. Mathematical notations should be simple and suitable for a multidisciplinary audience. For example, fractions within fractions and subscripts within subscripts should be avoided. Where possible, incorporate equations into the text rather than as a separate figure.

**Units, quantities, and abbreviations:** Use SI (metric) units and international quantities and abbreviations. Equivalent values in other systems may be used, provided their metric equivalents are included in every case. Note that percent, ppm, and ppb are not metric units.

**Footnotes:** Avoid text footnotes. Footnote material should be incorporated into the text for the benefit of the readers, editors, and printers.

**Acknowledgement:** If an acknowledgement is included, it should not contain lengthy descriptions of the reason for the acknowledgement.

**References:** For references, please follow CSE citation-sequence style. Information about CSE citation format can be found at <http://www.scientificstyleandformat.org/Tools/SSF-Citation-Quick-Guide.html>. If you have additional questions about references or other formatting issues, please contact T&I at [tjournal@academyofinventors.org](mailto:tjournal@academyofinventors.org).

--

The designated corresponding author will receive a proof of their article in PDF format via email before publication. The corresponding author should answer all queries at this time and carefully check all editorial changes within 48 hours of receipt. Corrections at this stage should be limited to printer's errors and minor changes. No major changes or rewrites are allowed.

**Open Access:** To help authors reach maximum exposure for manuscripts published in *Technology and Innovation*, T&I utilizes Open Access publishing. Fees are billed when a manuscript is accepted for publication.

#### Open Access Fee Rates

Standard Single Submission:	\$1,000
NAI Fellow Contributed Single Submission:	\$800

If you are interested in publishing with T&I but believe you will be unable to meet the Open Access fees, please contact [tjournal@academyofinventors.org](mailto:tjournal@academyofinventors.org) or (813) 974-1347.

**Copyright:** If data from any source other than the authors is used in tables or figures, it is the responsibility of the authors to obtain permission to reproduce such material. Editorial staff may ask authors to provide proof that permission has been granted from the original publisher and indicate the source when signing our copyright forms.

## COMPETING INTERESTS

Competing interests/conflicts-of-interest "exist when an author (or the author's institution), reviewer, or editor has financial or personal relationships that inappropriately influence (bias) his or her actions (such relationships are also known as dual commitments, competing interests, or competing loyalties). These relationships vary from those with negligible potential to those with great potential to influence judgment...The potential for conflict of interest can exist whether or not an individual believes that the relationship affects his or her scientific judgment. Financial relationships (such as employment, consultancies, stock ownership, honoraria, paid expert testimony) are the most easily identifiable conflicts of interest."

-International Committee of Medical Journal Editors ("Uniform Requirements for Manuscripts Submitted to Biomedical Journals"), February 2006

Author(s) should indicate any competing interests with the information in their submission. If the author(s) do not have competing interests to disclose, they should still include a statement with their submission to this effect (e.g., "The authors declare no conflict of interest.").

**For any questions relating to formatting or submitting manuscripts, please contact T&I at [tjournal@academyofinventors.org](mailto:tjournal@academyofinventors.org) or (813) 974-1347.**
